

April 28th International Workers Memorial Day

strong
unions
=
safe
jobs

organise

Every year **over a million people die from accidents or illness** caused by bad working conditions. This can be prevented through:

- ◆ Strong Laws which are properly enforced in the workplace
- ◆ Prevention of accidents like falls from heights, or with unguarded machines
- ◆ Health protection from dangerous substances like deadly asbestos dust
- ◆ Workers' Participation through trade union safety representatives
- ◆ Right to refuse dangerous work
